DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 12-19, drawn to a computer system and a method for matching documents to determine respective action to be taken based on the user selection, classified in class 702, subclass 516.
 - II. Claims 9-11, 20-22, drawn to a computer system and a method for filling the form in the determined position with the user information, classified in class 382, subclass 306.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as data retrieval and an electronic form filling. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. The inventions are distinct, each from the other because they have acquired a separate status in the art as shown by their different classification and have acquired a separate status in the art because of their recognized divergent subject matter.

2. A telephone call was made to Mr. Greeley on January 22, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2625

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
